

Technical Parameters

Model		Kirin440C	Kirin560C	Kirin660C
Technology		Single Pass, Piezoelectric Inkjet		
Printing Method		CMYK Double-Side Printing		
Ink Type		Water-based Pigment		
Max. Resolution		1200 * 600 DPI		
Max. Printing Speed		100 m/min		
Media Types		Inkjet Treated, Wide Range of Standard Coated and Uncoated Offset Media, Other Papers Subject to Testing from 45-165 gsm		
Media Thickness		45-165 gsm		
Max. Media Width		440 mm	560 mm	660 mm
Max. Printing Width		432 mm	540 mm	648 mm
Max. Media Diameter		1270 mm		
Transportation Method		Roll to Roll, Roll to Sheet (Optional)		
Equipment Dimensions				
Roll to Roll	Power	Printer: 35 kW; Drying: 50 kW		
	Dimension	10250 * 4200 * 2300 mm (L * W * H)		
Roll to Sheet	Power	Printer: 42 kW; Drying: 50 kW		
	Dimension	13880 * 4200 * 2300 mm (L * W * H)		
Working Environment				
Temperature		18-24 °C		
Constant Humidity		40-60% (Non-condensing) Independent, Clean, Low Dust, Low Light Exposure, Well-ventilated

Kirin440C/560C/660C

CMYK COLOR DIGITAL INKJET SOLUTIONS

CMYK COLOR DIGITAL INKJET PRINTING SYSTEM

Printing quality meets international standards on publication, government documents, industrial user manuals and other POD color printing requirements.

Optional Width: **440 mm / 560 mm / 660 mm** Max. Resolution: **1200 * 600 DPI** Max. Printing Speed: **100 m/min**

Roll-to-Roll Solution

High Productivity, Low Consumption, Creating Flexible and Rapid Response Capability

- Using industrial-grade piezoelectric ceramic print head for high productivity and resolution, with seamless single-sheet feeding to meet diverse customer size needs.
- Max. Printing Speed: **100 m/min**
- Max. Resolution: **1200 * 600 DPI**
- Optional Width: **440 mm / 560 mm / 660 mm** (Max. Media Width); **432 mm / 540 mm / 648 mm** (Max. Printing Width)
- Self-developed quick-drying ink enables grayscale printing as small as 5 pl, resulting in finer images and sharper text.
- No need for plate-making, printing starting from a single copy, shorter delivery times, reduced inventory pressure, and rapid response to market demands.

Resolution Configuration for Ensuring Stable Printing Quality

- Integrated framework body with high processing resolution and structural stability.
- Integrated inkjet control system that monitors various components of the inkjet printing system in real time.
- Utilizes active unwinding with a multi-node tension control system, ensuring high precision and minimal tension fluctuations.
- Equipped with international top brands' alignment devices, motors, electromagnetic valves, and electronic components to ensure long-term equipment stability in production.
- Can be configured with a printhead water cooling system to ensure stable printhead operation.

Core Independent R&D Capabilities

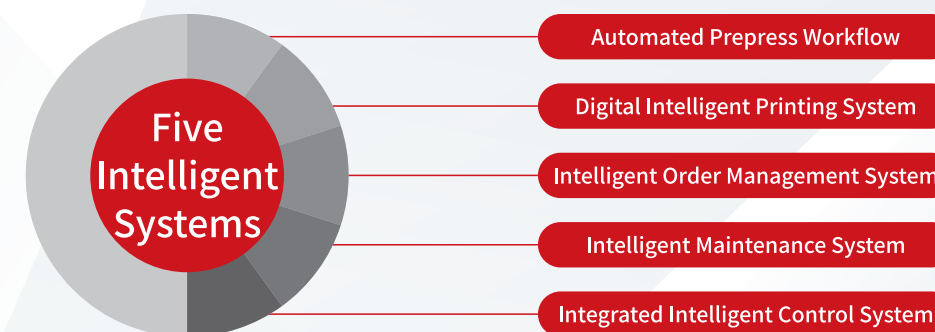

- Holds independent intellectual property for digital inkjet technology and develops core software, mechanical platforms, inkjet systems, and more.
- Collaborates with print head manufacturers, accumulating over a decade of experience in high-speed industrial print head research and application, mastering core print head driving technology for exceptional inkjet performance.
- Self-developed water based inks, creating an inkjet industry ecosystem. Quick-drying ink meets green environmental standards, fast dries, reduces energy consumption in drying systems, and offers stability for various paper types, with controlled costs.

- HanGlobal Digital Printing and Cutting System (Optional)

Efficient and advanced cutting technology enables efficient roll-to-sheet cutting, staggered bookbinding, and stable cutting for various specifications and sizes, with a maximum cutting speed of **100 m/min**.

Roll-to-Sheet Solution

Comprehensive Solution

- HanGlobal provides end-to-end comprehensive solutions, including pre-press processing, printing, cutting, and ink supply.
- Options: Roll-to-Roll Solution / Roll-to-Sheet Solution

Suitable for Various Printing
